SUMMARY

Senior Frontend Developer with more than 7 years of professional experience in web development and leading development teams. Proficient in designing and implementing high-load, user-friendly interfaces using modern technologies such as React.js, Vue.js, Nuxt 3, Next.js 14, among others. Strong expertise in performance optimization, implementation of PWAs, and use of TypeScript in large projects. Proven record of accomplishment in leading cross-functional teams and utilizing the Agile methodology to manage projects from ideation through successful delivery, ensuring that all code quality, security, and optimization standards are met. Dedicated to continuous improvement, leveraging the latest industry trends in pursuit of crafting exceptional user experiences and delivering scalable, efficient software solutions.

TOP SKILLS

Vue, Nuxt 3, React, Next 14, Vite, Vuetify, Tailwind CSS, TypeScript, SASS/SCSS, Webpack, Responsive, GraphQL, Apollo client, Rest Api, SEO Optimization, Performance Optimization, Testing (Vitest), Progressive Web Apps (PWA), Git

WORK EXPERIENCE

Nobel Pixels

Front-End Chapter Lead · (August 2022 - Present)

- Contributed to a public website built using Server-Side Rendering (SSR), delivering solutions for performance optimization and SEO improvement.
- Developed various management panels such as content management, CRM, and product management panels and implemented designs from Figma.
- Managed cross-functional teams of over 10 members, ensuring efficient project delivery and synergy among team members.
- Active participant in project meetings, contributing to requirements analysis, tool selection, task planning, and allocation, ensuring streamlined project execution.
- Developed workflows based on Agile/Scrum methodologies to manage tasks and client requests efficiently.
- Employed OpenAPI Generator to produce code from APIs provided in Swagger.
- Created documentation for coding standards and Git branch strategies, reducing the onboarding process for new hires by one to two weeks.

Farsi Studio

Senior Frontend Developer · (March 2021 - August 2022)

- Successfully deployed diverse landing pages and management panels, maintaining pixel-perfect precision.
- Led the migration of legacy codebases to modern JavaScript frameworks, improving maintainability and performance.
- Developed responsive web applications, ensuring compatibility across various devices and browsers.
- Partnered with UX/UI designers to translate design wireframes into high-quality code.
- Integrated third-party services and APIs such as Firebase, Stripe, and Google Analytics to extend application functionalities.

Giti Sanat Roxana

Technical Manager · (September 2019 - February 2021)

- Experience participating in a startup supported by the Incubation and Entrepreneurship Center of the University of Isfahan, specializing in developing software solutions for the healthcare sector.
- Experience with embedded devices and technologies, such as Raspberry Pi and other similar platforms.

Ayapak Solutions

Frontend Developer · (November 2017 - August 2019)

- Contributed to projects involving interactive maps, employing tools like Leaflet.js for implementation.
- Increased code quality, readability, and maintainability in Angular and React projects by using TypeScript.
- Implemented responsive designs using CSS frameworks like Bootstrap.

Danesh Salar Iranian

Software Developer · (July 2016 - October 2017)

- Engaged with a small software team at a knowledge-based company in the healthcare sector.
- Implemented software with heatmaps to display pressure distribution by integrating with health measurement devices handling big and fast data.
- Developed a medical assistant software using a database to monitor and track the condition of athletes.

EDUCATION

Payam-e Noor University (Tehran Distance Education)

Master's degree, Computer Software Engineering · (2019 - 2021)

University of Kashan

Bachelor's degree, Computer Engineering · (2013 - 2018)
