SUMMARY

Senior Front-End Developer with over 6 years of professional experience, specializing in Nuxt and Vue.js. My expertise lies in creating dynamic, user-friendly web applications and leading development teams to deliver high-quality software solutions. Passionate about staying current with the latest technologies and best practices, I have a proven track record of driving projects from concept to completion, ensuring seamless user experiences and efficient performance.

TOP SKILLS

Vue.js, Nuxt.js, Vuetify, TypeScript, JavaScript, HTML, CSS, SASS/SCSS, Webpack, Responsive, SEO Optimization, Performance Optimization, Testing (Jest), Progressive Web Apps (PWA), Git

WORK EXPERIENCE

Nobel Pixels

Senior Frontend Developer - Toronto/Canada - Remote - (August 2022 - Present)

- Developed various management panels such as content management, CRM, and product management panels using Nuxt.js v3 and implemented designs from Figma.
- Collaborated effectively in cross-functional teams of over 10 members, ensuring efficient project delivery and synergy among team members.
- Took a leadership role in mentoring and upskilling team members in JavaScript, Vue, and Nuxt, driving skill enhancement and team performance.
- Active participant in project meetings, contributing to requirements analysis, tool selection, task planning, and allocation, ensuring streamlined project execution.
- Provided technical insights and solutions during project planning and architectural discussions.
- Utilized Agile/Scrum methodologies to manage tasks and client requests efficiently.
- Employed OpenAPI Generator to produce code from APIs provided in Swagger.
- Created documentation for coding standards and Git branch strategies, reducing the onboarding process for new hires by one to two weeks.

Farsi Studio

Frontend Developer - Tehran/Iran - (March 2021 - August 2022)

- Successfully deployed diverse landing pages and management panels, maintaining pixel-perfect precision.
- Led the migration of legacy codebases to modern JavaScript frameworks, improving maintainability and performance.
- Developed responsive web applications, ensuring compatibility across various devices and browsers.
- Worked closely with UX/UI designers to translate design wireframes into high-quality code.
- Integrated third-party services and APIs such as Firebase, Stripe, and Google Analytics to extend application functionalities.

Giti Sanat Roxana

Technical Manager - Isfahan/Iran - (September 2019 - February 2021)

- Experience participating in a startup supported by the Incubation and Entrepreneurship Center of the University of Isfahan, specializing in developing software solutions for the healthcare sector.
- Experience with embedded devices and technologies, such as Raspberry Pi and other similar platforms.

Ayapak Solutions

Frontend Developer - Tehran/Iran - (November 2017 - August 2019)

- Contributed to projects involving interactive maps, employing tools like Leaflet.js for implementation.
- Utilized TypeScript to enhance code quality, readability, and maintainability in Angular and React projects.
- Implemented responsive designs using CSS frameworks like Bootstrap.

Danesh Salar Iranian

Software Developer - Tehran/Iran - (July 2016 - October 2017)

- Worked in a small software team at a knowledge-based company in the healthcare sector.
- Implemented software with heatmaps to display pressure distribution by integrating with health measurement devices handling big and fast data.
- Developed a medical assistant software using a database to monitor and track the condition of athletes.

EDUCATION

Payam-e Noor University (Tehran Distance Education)

Master's degree, Computer Software Engineering · (2019 - 2021)

University of Kashan

Bachelor's degree, Computer Engineering · (2013 - 2018)
